

Resume

Rob Procter

National Centre for e-Social Science (NCeSS), University of Manchester

Rob's role within NCeSS is mainly devoted to coordinating and developing the NCeSS research programme. He is the Research Director

Research interests

Prior to joining NCeSS, Rob was leader of the Social Informatics Cluster, a multi-disciplinary research group within the School of Informatics, University of Edinburgh. His research focused on socio-technical issues in the design, implementation, evaluation and use of interactive computer systems, with a particular emphasis on ethnomethodologically-informed ethnographic studies of work practices, computer-supported cooperative work and participatory design. Rob has published over 100 academic papers and has held grants from EPSRC, ESRC, MRC, DTI and EU.

Rob is PI on the ESRC-funded e-Infrastructure for social sciences project, Co-I on the MRC e-Science programme NeuroGrid project, the EPSRC usability and e-Science programme ADVISES project, the JISC-funded MEMETIC and StORe projects, and the EU funded AVROSS project. He also coordinates with Tom Rodden the joint NCeSS-eSI theme on the adoption of e-Research Technologies. He is editor of the Health Informatics Journal, on the editorial boards of Interacting with Computers, the Enterprise Information Management Journal and the International Journal of IT Standards and Standardisation Research, and a co-editor of the forthcoming special issue of the Journal of Computer-Supported Cooperative Work on Collaboration and e-Research.
