David Darmofal is an Associate Professor in the Department of Political Science at the University of South Carolina. He received his Ph.D. from the University of Illinois at Urbana-Champaign and was a Post-Doctoral Fellow in the Program in Statistics and Methodology at Ohio State University. His principal research interests are in political behavior, political geography, and American political development. His research has been published in journals such as the American Journal of Political Science, the Journal of Politics, Political Geography, Political Research Quarterly, Political Behavior, Political Psychology, and American Politics Research. He has also recently completed a book manuscript, Spatial Analysis for the Social Sciences, which is under contract with the Analytical Methods for Social Research series at Cambridge University Press. This book will serve as a critical reference for applied researchers and methodologists in a broad range of disciplines, including Demography, Economics, Political Science, Sociology, Criminology, and Public Health. His current research includes studies of the effects of spatial dependence on survey inferences, the effects of spatial proximity on legislators’ roll-call voting behavior, and the effects of spatial heterogeneity in congressional elections.
